BREAKTHROUGH INNOVATIONS: ESSENTIA-INC.COM

About:

Defining Essentia. Redefining Cable.

Who: We are the experts you trust to deliver first.

What: We design & build turnkey outdoor & indoor networks with unrivaled quality and record-setting cycle times for Cable, Telecom, Enterprise & beyond.

How: By delivering tech-enabled infrastructure services including drone data capture, drawing automations, and machine learning – all powered by our proprietary eSpeed Technology Platform.

Why: Because legacy manual processes are inefficient and error prone. We want our team to focus on the next breakthrough innovation, not tedious tasks.

Based in Charlotte, N.C., Essentia has planted roots across the country, with remote offices and teams united by a dynamic culture. We remain entrepreneurial at our core, taking a Silicon Valley-inspired approach to disrupt the communications industry.

Services + Solutions

With decades of experience supporting MSOs, Essentia has now sharpened its focus on the Cable space, utilizing our trademark approach of rethinking status quo tools and workflows.

Outside Plant Technical Services

- eSpeed aerial & underground plant engineering
- Fiber construction
- Project Management
- Construction Coordination
- Fiber Splicing
- Wireless engineering & implementation

Inside Plant Deployment:

Our experienced, in-house team performs the following:

- Network wire management including cable installation, infrastructure support, RF combining, Optical distribution
- Essentia in-house deployment teams with years of cable industry experience
- Staff augmentation (Technicians & Engineers)
- Deployment of services to support:
 - Node Segmentation
 - DOCSIS CMTS installation
 - Advanced & Legacy video
 - Capacity and bandwidth management
 - Performance optimization & troubleshooting

eSpeed Technology Platform

eSpeed defined: A set of different technologies — hardware, software, and tools – wrapped around efficient processes through proprietary programming and workflows.

The eSpeed Advantage:

Work faster with workflow automation & automatic integrations

Elevate accuracy by removing manual transcription errors & keeping the same data in the same place

Leverage embedded best practices to drive repeatability while streamlining stakeholder reporting & approvals

Move at the Speed of

Our IoT-enabled solutions are deployed through our proprietary eSpeed Technology Platform. The upshot is enabling MSOs to modernize their network infrastructure, inside and outside the headend, with the speed and quality of execution never before experienced in the Cable industry.
